Millstone Nuclear Power Station, Unit No. 3
Revised Commitment

In a letter dated March 30, 1994, Northeast Nuclear Energy Company (NNECO) responded to a Notice of Violation on design deficiencies with the Auxiliary Building Filter System (ABFS). In paragraph V.3, NNECO identified actions associated with thirteen Engineering Work Requests (EWRs) as corrective steps that will be taken to avoid further violations.

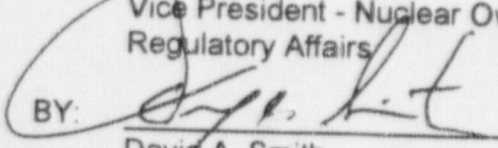

One of the EWRs, 3-93-00114, was scheduled for completion during the current refueling outage. The purpose of this letter is to remove EWR 3-93-00114 from the list of EWRs committed to in our letter of March 30, 1994. It has been determined that the actions to be implemented by this EWR are not corrective steps to avoid further violations with ABFS. Our other commitments associated with our letter submitted March 30, 1994, are not affected by this commitment change.

Should you have any questions regarding this submittal, please contact Mr. David W. Dodson at (860) 447-1791, ext. 2346.

Very truly yours,

NORTHEAST NUCLEAR ENERGY COMPANY
