Subject: License Amendment Application to Revise Technical Specification (TS) 6.4, Training; TS 6.5.2.8, Audits; TS 6.10, Record Retention; TS 6.14, Process Control Program; and TS 6.15, Offsite Dose Calculation Manual (LAR Number 98-0011; TAC No. MA6095)

Ladies and Gentlemen:

Enclosed is an application to amend the Davis-Besse Nuclear Power Station (DBNPS), Unit Number 1, Operating License Number NPF-3, Appendix A, Technical Specifications (TS). The proposed changes involve Technical Specification (TS) 6.4, Training; TS 6.5.2.8, Audits; TS 6.10, Record Retention; TS 6.14, Process Control Program; and TS 6.15, Offsite Dose Calculation Manual.

This License Amendment Request (LAR) proposes removing TS 6.4, (Training), relocating TS Section 6.5.2.8 (Audits) and 6.10 (Record Retention) to the DBNPS Updated Safety Analysis Report (USAR) Chapter 17 Quality Assurance Program, and making related changes to TS 6.14 (Process Control Program) and TS 6.15 (Offsite Dose Calculation Manual). In addition, an editorial correction is proposed to TS 6.8, Procedures and Programs.

These changes are proposed as line item TS improvements similar to the approach provided by the NRC in the improved "Standard Technical Specifications - Babcock and Wilcox Plants," NUREG-1430, Revision 1, dated April, 1995. Additionally, the proposed changes to TS 6.5.2.8, TS 6.10, TS 6.14, and TS 6.15 are consistent with the recommendations in NRC Administrative Letter 95-06, "Relocation of Technical Specification Administrative Controls Related to Quality Assurance," dated December 12, 1995, (DBNPS letter Log Number 4661).
