SUBJECT: Material License #25-23133-01

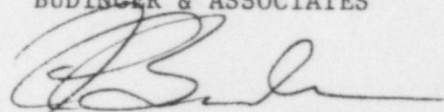

Gentlemen:

In response to your notice #86-31 of May 5, 1986, we wish to call your attention to the fact that we have closed our Montana office approximately 1 year ago. The nuclear equipment (CPN MC-1) has been transferred to our Spokane office and is in current operation there under Washington DSHS License (#WN-I0139-1) valid through 1990.

As we operate in many northwestern states, we do which to keep our NRC license active, although no radioactive equipment is presently based outside of Washington. NRC was notified of this in writing at the time our Montana office was closed. Please feel free to call if further clarification is necessary.

Sincerely,

BUDINGER & ASSOCIATES
