RE: Kerin and Associates, P.C.
NRC License No. - 25-23319-02
Troxler Model 3400 B Moisture/Density Gauge

Dear Mr. Brown:

You asked that we amend our current license with the Nuclear Regulatory Commission with regard to our license to operate our Troxler Nuclear Densometer Moisture/Density Gauge (Troxler Model B-3400). We relocated from our place of business on North Black Street in December of 1997 and relocated to 105 West Main Street. More importantly, I have relocated our gauge and our cabinet, where we house is when it is not in use to my storage shed at my personal residence at 609 South 6th Street in Bozeman. In lieu drawing a floor plan of this shed I am attaching some pictures of it. The shed is locked when not in use as is the gauge in the cabinet we use to store the gauge. I ask that you amend and update our NRC license to reflect this change in location for the gauge.

Thank you for your continued cooperation with us.

Sincerely,

Richard T. Kerin, P.E.
