IE SUMMARY SER POSITION STATEMENT  
 IMPLEMENTATION OF THE WNP UNITS 1 & 4 QA PROGRAM  
 DOCKET NOS. 50-460 & 50-513

ASSESSMENT

The Office of Inspection and Enforcement has conducted inspections to examine the implementation of the WNP Units 1 and 4 QA Program to ascertain its conformance with related 10 CFR 50, Appendix B, PSAR commitments. Our examinations encompassed the organization of the Applicant and the QA audit, review and approval functions of the Applicant for those major contractors selected to date. These examinations focused on quality assurance activities related to the design, procurement and construction of the nuclear power plants and included a review of established procedures and instructions and the execution of applicable provisions contained therein.

Our assessment includes consideration of the results of the above inspection activities and of the Applicant/contractor actions leading to the resolution of identified deficiencies, or delays in timely establishment and procedures and instructions, as necessary, to arrive at effective implementation of PSAR QA commitments. Based thereon, the Office of Inspection and Enforcement has determined that there are no substantive unresolved issues relating to the implementation of the QA program which require further identification and followup at this time.

CONCLUSIONS

Based on the above assessment, the Office of Inspection and Enforcement concludes that the implementation of WNP Units 1 and 4 QA program PSAR commitments is consistent with the status of the nuclear project and is sufficient to warrant the commencement of safety related construction as would be authorized under the requested Limited Work Authorization II.
