Attention: Mr. J. B. Martin, Regional Administrator

Dear Sir:

Subject: Docket Nos. 50-361 and 50-362  
Follow-up Report, Inoperable Fire Doors - December 1986  
San Onofre Nuclear Generating Station, Units 2 and 3

Reference: Letter, H. E. Morgan (SCE) to J. B. Martin (NRC),  
dated December 15, 1986

In accordance with our referenced letter, this submittal provides the follow-up report of Technical Specification fire-rated assemblies (specifically fire doors) found inoperable during routine surveillances in December 1986.

Fire doors found inoperable during the December routine surveillances are identified in the Attachment and include: 5 latching mechanism failures, 3 closure mechanism failures. No doors were found blocked open in December. As each of these deficiencies was identified, compensatory fire watches, pursuant to Technical Specification 3.7.9, Action Statement 'a', were established. Door mechanism failures are being corrected on an "as found" basis.

Mr. J. B. Martin

-2-

This monthly follow-up report and those sent previously provide updated information associated with an ongoing condition initially reported in 1983. The follow-up report covering inoperable fire doors identified in January 1987 will be submitted by February 16, 1987.

If you require any additional information, please so advise.

Sincerely,

A handwritten signature in black ink, appearing to read "H. E. Morgan", followed by a horizontal line extending to the right.

Enclosure:
