Dear Mr. Conway:

Pump and Valve Operability Audits

By letter dated May 9, 1986, the staff transmitted the equipment list for both the seismic and pump and valve operability audits. Based on subsequent conversations with your staff, we have learned that certain components are unavailable. Therefore, Enclosure 1 contains a list of alternate BOP and NSSS equipment for the seismic audit. Enclosure 2 contains an alternate component for the pump and valve operability audit. Long forms should be completed for the components and submitted to the staff with a copy to EG&G Idaho, Inc., by June 13, 1986.
