Voluntary Response to Administrative Letter 99-02 for Fiscal Years
2000 and 2001

GNRO-99/00064

Gentlemen:

NRC Administrative Letter 99-02, Operating Reactor Licensing Action Estimates, dated June 3, 1999 (GNRI-99/00041) requested licensees to voluntarily provide an estimate of the number of licensing actions that will be submitted for the remainder of Fiscal Year (FY) 2000 and FY2001. Entergy Operations is providing the estimated licensing action information by this letter for Grand Gulf Nuclear Station. Grand Gulf Nuclear Station plans to submit approximately six Technical Specification (TS) amendment requests in FY2000 and FY2001. One of the TS amendments will require a complex review in FY2000 since it deals with changes resulting from revised source term calculations. Another possible TS change involving power uprate may occur in FY2001. This change is considered tentative since it is still in the evaluation and planning stages at this time.

The table on the following page represents an estimate of licensee-originated licensing actions for GGNS:
