BROWNS FERRY NUCLEAR PLANT (BFN) - RESOLUTION OF INSPECTOR ITEMS

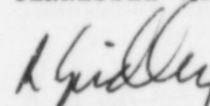

In Section IV of the Browns Ferry Nuclear Performance Plan, TVA committed to resolving open inspection report findings before unit 2 restart. In support of this goal, there has been an active effort ongoing for several months directed toward dispositioning outstanding inspection findings with your resident and regional inspectors.

For unit 2 restart purposes, it is important that we are confident that all NRC open items have been identified and properly resolved. In order to cross check our database, we request that NRC provide a listing of the inspection items which are currently being carried as open. Your database would typically identify these items by the data codes DEV, IFI, OPN, VIO, IEB, SL4, and SL5. As noted above, this information will allow us to correlate our tracking systems and will ensure that we have captured all open NRC inspection report findings.

Your assistance in this matter is appreciated and a response by February 27, 1987 would be helpful to our effort. Please get in touch with M. J. May at (205) 729-3570 if further information is required.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

R. Gridley, Director
Nuclear Safety and Licensing
