Mr. Ladin Delaney, Executive Officer
California Regional Water Quality Control Board
San Diego Region
6154 Mission Gorge Road, Suite 205
San Diego, California 92120

Dear Mr. Delaney:

Subject: NPDES Monitoring Report
San Onofre Nuclear Generating Station, Unit 3

The SONGS Monitoring Report covering the month of August is submitted in accordance with the requirements of CRWQCB Order 85-13 (NPDES Permit No. CA0108181). A summary of the generating unit's status and significant analytical results is provided below.

The unit was in operation the entire month. All sampled water sources were found to be within permit limits with the exception of the length of heat treatment on August 2nd and the combined discharge delta T, which was high on August 3rd. The cause of these violations has been identified and procedures have been changed to prevent recurrence.

Pursuant to Order No. 85-13, Reporting Requirement 12, your letter dated June 25, 1985, authorizes the following representative(s) to sign and certify all reports required by this order: Arthur Kneisel, Environmental Engineer.

I certify under penalty of law that I have personally examined and am familiar with the information submitted in the attached document; and based on my inquiry of those individuals immediately responsible for obtaining the information, I believe the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

Sincerely,

Enclosure
