Texas Utilities Generating Company
ATTN: Mr. W. G. Council
Executive Vice President
400 North Olive Street, Lock Box 81
Dallas, Texas 75201

Gentlemen:

This refers to the construction inspection conducted by Mr. H. S. Phillips during the period September 1-30, 1986, of activities authorized by NRC Construction Permits CPPR-126 and CPPR-127 for the Comanche Peak Steam Electric Station, Units 1 and 2, and to the discussions of our findings with Messrs. R. Camp and D. Reynerson and other members of your staff at the conclusion of the inspection.

Areas of construction examined during the inspection included plant status, general plant inspections, posting of NRC regulations, safety injection system pipe welding, nondestructive examination of welds, delta ferrite testing, and fire prevention/protection. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the NRC inspectors. These findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.

We have also examined actions you have taken with regard to previously identified inspection findings. The status of these items is identified in paragraph 4 of the enclosed report.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

8702240431 870217
