Docket: 50-267/86-27

Public Service Company of Colorado
ATTN: Robert O. Williams, Jr.
Vice President, Nuclear Operations
P. O. Box 840
Denver, Colorado 80201-0840

Gentlemen:

This refers to the inspection conducted by Messrs. M. E. Skow and W. R. Bennett of this office during the period September 22-26, 1986, of activities authorized by NRC Operating License DPR-34 for Fort St. Vrain, and to the discussion of our findings with Mr. L. W. Singleton and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included licensed operator training, nonlicensed staff training, and in-office LER review. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors. The inspection findings are documented in the enclosed inspection report.

During this inspection, it was found that certain of your activities were in potential violation of NRC requirements. However, since this potential violation is related to training, it is not cited herein as a violation but is considered to be an unresolved item in accordance with the Commission Policy Statement on Training and Qualification of Nuclear Power Plant Personnel (50 FR 11147). No response is required; however, your attention to the unresolved item which has the potential of becoming a violation in the future is warranted.

One unresolved item is identified in paragraph 5 of the enclosed inspection report.

We have also examined actions you have taken with regard to previously identified inspection findings. The status of these items is identified in paragraph 2 of the enclosed report.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Original Signed By
J. E. Gagliardo
J. E. Gagliardo, Chief
