Attention: Document Control Desk  
Washington, D.C. 20555

Dear Sir:

Three Mile Island Nuclear Station Unit 1 (TMI-1)  
Operating License No. DPR-50  
Docket No. 50-289  
Response to Regulatory Effectiveness Review

On January 5, 1987, the NRC issued the Regulatory Effectiveness Review report for TMI-1. It was requested that GPUN respond to the report within 45 days of the date of the report. Upon review of the RER report and Inspection Report 86-15, which reviewed actions taken in response to the RER Team's preliminary findings, we believe that the significant concerns that were identified have been resolved.

We wish to comment on the RER report but due to the resource commitment to the current outage at TMI-1, we will not be able to respond until 45 days after startup from the outage. We feel this is acceptable since no significant concerns are unresolved.

Sincerely,

H. D. Hickill

Vice President & Director, TMI-1
