Gentlemen:

ULNRC-1448

DOCKET NUMBER 50-483
CALLAWAY PLANT
REVISION TO DIESEL GENERATOR TECHNICAL SPECIFICATIONS

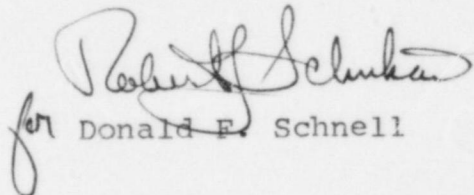

Reference: ULNRC-1376, dated 9/29/86

The referenced letter transmitted an application for amendment to Facility Operating License No. NPF-30 for Callaway Plant. The amendment request modified the Callaway Technical Specification, Section 3/4.8.1.1 with respect to diesel generator (D/G) testing.

As a result of recent telephone discussions between NRC Staff (P. O'Connor and J. Lazevnick), the Callaway D/G manufacturer and Union Electric, minor changes have been made in the proposed D/G test program from that originally provided in the referenced letter. The changes are included in Attachment 1 of this letter. The areas of change from the original submittal are indicated by underlining. Attachment 2 provides a supplemental evaluation that addresses each of the areas of change.

If there are additional questions in this matter, please contact us.

Very truly yours,

for Donald F. Schnell

DS/lad
