BVY 99-111

U.S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington, DC 20555

**Subject: Vermont Yankee Nuclear Power Station
License No. DPR-28 (Docket No. 50-271)
Revision of Technical Specification Bases Page**

This letter provides a revised Technical Specification (TS) Bases page.

Bases page 91 has been revised to allow the reactivity anomaly beginning-of-cycle steady state core reactivity to be normalized between off-line (predicted) uncorrected solution and the on-line (measured) 3D-Monicore exposure corrected solution.

This change to the TS Bases has been determined to not involve an unreviewed safety question in accordance with 10CFR50.59 and therefore does not require prior NRC approval.

Also attached for your convenience is a marked-up Bases page indicating where the specific changes were made.

Should you have any questions concerning this matter, please contact Mr. Jeffrey T. Meyer at (802) 258-4105.

Sincerely,

VERMONT YANKEE NUCLEAR POWER CORPORATION

Gautam Sen
Licensing Manager
