SUBJECT: MILLSTONE NUCLEAR POWER STATION, UNIT 3 - CORRECTION TO AMENDMENT
NO. 122 (TAC NO. M92203)

Dear Mr. Carns:

By letter dated December 28, 1995, the Commission issued Amendment No. 122 to Facility Operating License No. NPF-49 for the Millstone Nuclear Power Station, Unit 3, in response to your application dated May 1, 1995. As part of the amendment, Technical Specification (TS) page 1-8 (Table 1.1) was revised. We have recently become aware that this page should not have been included in the revision. In the May 1, 1995, application, you stated that the change to Table 1.1 did not stand-alone and that it was being submitted in advance. You further stated that future proposals will provide justification for changing each of the surveillances with a frequency of 18-months. Since additional TS surveillance changes are needed to complete the conversion to a 24-month fuel cycle, this page should not have been issued with Amendment No. 122. Enclosed is the original TS page 1-8.

Sincerely,
Original Signed by:

James W. Andersen, Project Manager
Special Projects Office - Licensing
Office of Nuclear Reactor Regulation

Docket No. 50-423
