Dear Mr. Keppler:

- References: (1) Fermi 2  
NRC Docket No. 50-341  
NRC License No. NPF-43
- (2) Order Modifying License  
dated July 3, 1986

Subject: Reactor Control Room  
Audit Program

This letter is written in response to Reference 2. Enclosed are copies of the Reactor Control Room Audit Plan (Attachment 1) and a list of proposed audit team members (Attachment 2), as I and members of my staff discussed with you on July 9, 1986. The plan, which has been implemented on a trial basis, will be formally implemented within 7 days of receipt of your approval of the audit plan and team members.

When Detroit Edison Corporate Management determines that control room performance is consistently acceptable, the company will request your concurrence to terminate the program. Following your concurrence, Detroit Edison will submit a final report of the results and corrective actions associated with the program.

If you have any questions regarding this matter, please contact me or Mr. Frank E. Agosti (313) 586-4157.

Sincerely,

*B. Ralph Sylvia*
