JUN 16 1986

Docket No. 030-29281
Control No. 105567

Neville-Synthese Organics, Inc.
ATTN: Edward G. Stets
Radiation Safety Officer
P.O. Box 98
Oil City, Pennsylvania 16301

Gentlemen:

This is in reference to your application dated May 23, 1986 for a byproduct material license. In order to continue our review, we need the following additional information:

(1) Please specify the location of use by the street address, city and state or other descriptive address to allow us to easily locate your facility. A Post Office Box address is not acceptable.

(2) For the individuals listed in item 7 of your application, please specify when the training in the use and operation of the specific gauges was received and by whom the training was conducted.

(3) If persons other than those named in item 7 will operate a gauge that will be installed by the supplier or other specifically licensed person, you should make a commitment in your application that any employee who will operate your device will attend the training and instruction given at the time of installation or will receive equivalent training and instruction. If equivalent training is given, provide an outline of the training, show its equivalency to the training offered by the device installer and specify the name and qualifications of your instructors.

(4) Please provide a sketch (not blueprints) or description of the proposed location of each gauge within your facility and describe your security procedures or means of controlling access to the devices.

(5) Please specify the frequency for periodic inspections made by the RSO for proper shutter operation, visibility of labels, and condition of gauges.

(6) Please provide the emergency procedures to be followed in the event of accidents involving damage to the gauge.

We will continue our review upon receipt of this information. Please reply in duplicate to my attention at the Region I office and refer to Mail Control No. 105567.
