Congress of the United States
House of Representatives
Committee on Appropriations
Washington, D.C. 20515

May 30, 1979

Honorable Joseph M. Hendrie
Chairman
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Chairman:

The Committee's letter of May 24, 1979, advised you of the decision not to approve the Nuclear Regulatory Commission's reprogramming request submitted on April 26, 1979, until the resource requirements associated with the Three Mile Island incident could be determined and considered in relation to other needs. This action reflected our understanding that the Nuclear Reactor Regulatory (NRR) program has assigned a significant portion of its manpower resources to priority tasks associated with evaluation of the Three Mile Island incident. As a result, other licensing activities are being delayed and further significant delays are anticipated.

Considering the funds and manpower resources currently available to the Commission, the Committee sees no basis for delaying licensing activities while lower priority programs continue unaffected.

Certainly the Committee agrees that nuclear plant safety must have priority in Commission actions. But the Committee and the Congress must also weigh economic and other issues which affect the overall public well-being. The Committee has been told that delays in nuclear plant construction and operation can result in additional costs of up to \$1,000,000 a day for each plant delayed due to higher construction costs and replacement power. For the 50 plants now in the licensing phase, this could cost the consumer \$150,000,000 a month in unnecessary added costs.

8605230165 790530
PDR ADOCK 05000320
U PDR

The Committee also understands that the availability of power from many of the nuclear plants now planned or under construction is critically needed in several regions of the country. Without these plants, the regions face blackouts, rolling brownouts or loss of economic growth, along with the significantly higher costs to the consumer.

In its hearing on NRC's annual budget request, the Committee has continually expressed concern over the pace of NRC's power reactor facility licensing review and approval. The Committee believes that this reactor licensing process is the core of NRC's responsibility with other programs being supportive. To this end, the Committee believes that NRC resources as a whole should be available as necessary to meet critical needs in the licensing area.

It is our understanding that the significant delays in the licensing process could be avoided by the temporary addition of about 100 additional experienced personnel and \$3,000,000 for contractual efforts associated with the Three Mile Island evaluation. The Committee believes strongly that NRC should take immediate steps to (1) satisfy NRR's manpower requirements by a combination of shifting manpower resources from other NRC programs and obtaining assistance from other Federal agencies and (2) reprogram funds necessary to satisfy NRR's contractual requirements for TMI.

Sincerely,

Tom Bevill
Tom Bevill, Chairman

(6/11/79)

ACTION TO TAKE BEFORE ISSUANCE OF O.L.

I) Emergency Planning

- a) Establish off-site emergency operations center
- b) Prepare for joint utility, state, and NRC public information coordination.
- c) Implement a "key employee" recall plan for the utility and the site.
- d) Designate formal interdisciplinary incident response teams and procedures to integrate their capability into plant operations.
- e) Install lines of direct communication with NRC.

II) Operator Training & Procedures - ~~Shift - Takeover~~

- a) Review and revise, as necessary, selected list of key procedures in light of TMI-type events (List).
- b) Provide training of all operators on TMI-type events; on selected key multiple incident events; and on any revised procedures.
- c) Train operators on indications and procedures for verifying and monitoring natural circulation.
- ~~d) Implement staffing of an SRO and an engineer on all shifts.~~
- e) Review and revise, as necessary, administrative controls to prevent improper equipment alignments.

III) Analysis

Small break analyses (Owners' Group studies)

IV) Plant Modifications

- a) Implement SI on 2/3 low pressurizer pressure
- b) Implement in the control room a method to determine saturation status and margin to saturation.
- c) Establish a position or implement a design change on I.E. Circular 78-19 "Manual Override (Bypass) of Safety System Activation Signals"

V) Review Prior to OL and Implement, As Necessary, At a Convenient Time After OL

- a) Review adequacy of Post-accident monitoring instruments; particularly the wide-range instruments.
- b) Review adequacy of auxiliary feed system for long-term cooling, including location of critical equipment for maintainability and accessibility.
- c) Review adequacy of indications of PORV status.
- d) Review use of in-core T/C, including computer read-outs and procedures.
- e) Review the containment isolation design bases, including the need for isolation on high radiation.
- f) Review pressurizer heater energy sources.

VI) Long-Term Commitments

(Commit before OL to do a post-OL study and to implement revisions as are necessary based on the study)

- a) RV water level indication design alternatives.
- b) System venting design alternatives
- c) Adequacy of RHR, including locations of critical equipment and accessibility/maintainability
- d) Adequacy of RCS and containment remote sampling
- e) Adequacy of ranges of on-site radiation monitors
- f) Procedures for reviewing LER's $\Rightarrow \checkmark$
- g) Adequacy of recruiting and selection process for operators
- h) Review of adequacy training curriculum, methods of training, refresher training.
