Gentlemen:

In the Matter of) Docket Nos. 50-327
Tennessee Valley Authority) 50-328

SEQUOYAH NUCLEAR PLANT - TECHNICAL SPECIFICATION CHANGE 87-29

In accordance with 10 CFR 50.90, we are enclosing a requested amendment to licenses DPR-77 and DPR-79 to change the technical specifications of Sequoyah Nuclear Plant units 1 and 2. The proposed change revises table 3.8-2 to delete references to motor-operated valves (MOV) with bypassed thermal overload (TOL) devices and MOVs which are no longer considered active because of 10 CFR 50 Appendix R configurations or because their movement is not required for safety. In addition, the change also adds several active MOVs to the table which had been previously omitted. A typographical error in the unit 1 table is also corrected.

The proposed technical specification change is identified in enclosure 1. The justification for the proposed technical specification change is provided in enclosure 2. A proposed determination of no significant hazards consideration performed pursuant to 10 CFR 50.92 is provided in enclosure 3. Reference information on the Motor-Operated Valve Analysis and Test System (MOVATS) is provided in enclosure 4.
