Ms. Jenny M. Johansen  
United States Nuclear Regulatory Commission  
Region I  
631 Park Avenue  
King of Prussia, Pennsylvania 19406

Dear Ms. Johansen:

This is in reference to Mail Control No. 105581. Enclosed is a letter from Dr. Barry A. Solomon, Vice President of the Membrane and Biomedical Research Department of the Research Division, W. R. Grace & Co., addressing your questions concerning the relationship between Amicon and W. R. Grace.

In regard to the second part of your letter concerning the use of phosphorus-32, we will definitely incorporate your recommendations into our radiation safety procedures. In addition, we are preparing a request for a license amendment to have all radioactive work performed in a more limited-access laboratory room than we are presently assigned to. Enclosed are the special safety instructions to be provided to individuals using millicurie quantities of P-32.

Sincerely,

W. R. GRACE & CO.

Richard L. Duffy  
Radiation Safety Officer
