MEMORANDUM FOR: Philip Polk, Chief  
Performance Evaluation Branch  
Division of License Performance  
and Quality Evaluation, NRR

FROM: Kathleen Black, Chief  
Nonreactor Assessment Staff  
Division of Safety Programs, AEOD

SUBJECT: OCCURRENCE OF EVENTS INVOLVING WRONG UNIT/WRONG TRAIN/  
WRONG COMPONENT - UPDATE THROUGH 1986

Enclosed is an AEOD technical review report that updates the September 1986 list of events involving the wrong unit/wrong train/wrong component. The report adds 28 events to the prior total of 220 events for the period 1981 through the first six months of 1986.

A September 29, 1986, DHFT memo concerning the September 19, 1986, AEOD update of wrong unit/wrong train/wrong component events suggested that rates of occurrence of wrong unit/wrong train events indicate trends more accurately. This update focuses on the rates of occurrences of these events. In this update, the numbers of reported events have been normalized to show events per plant-year.

If you or your staff have any questions regarding this information, please contact Gene Trager of my staff. Mr. Trager can be reached on x24496.
