RE: NRC LICENSE NO. 47-23023-01
AMENDMENT TO NRC MATERIAL LICENSE

Dear Sir:

Please find enclosed a request to amend our present NRC license to include the use of a Coal Scan 3500 Coal Ash Analyzer, one at our Beth Station preparation plant and one at our Pine Creek preparation plant. The safety officer will be Andrew J. Sedlock and the persons trained in the use of the device are Norris D. Dyer and Dale F. Lucha. It will be maintained according to manufacturers specifications which are enclosed. The on-shift foreman at the plants will monitor the operation of the device.

Sincerely,

Kenneth G. Woodring

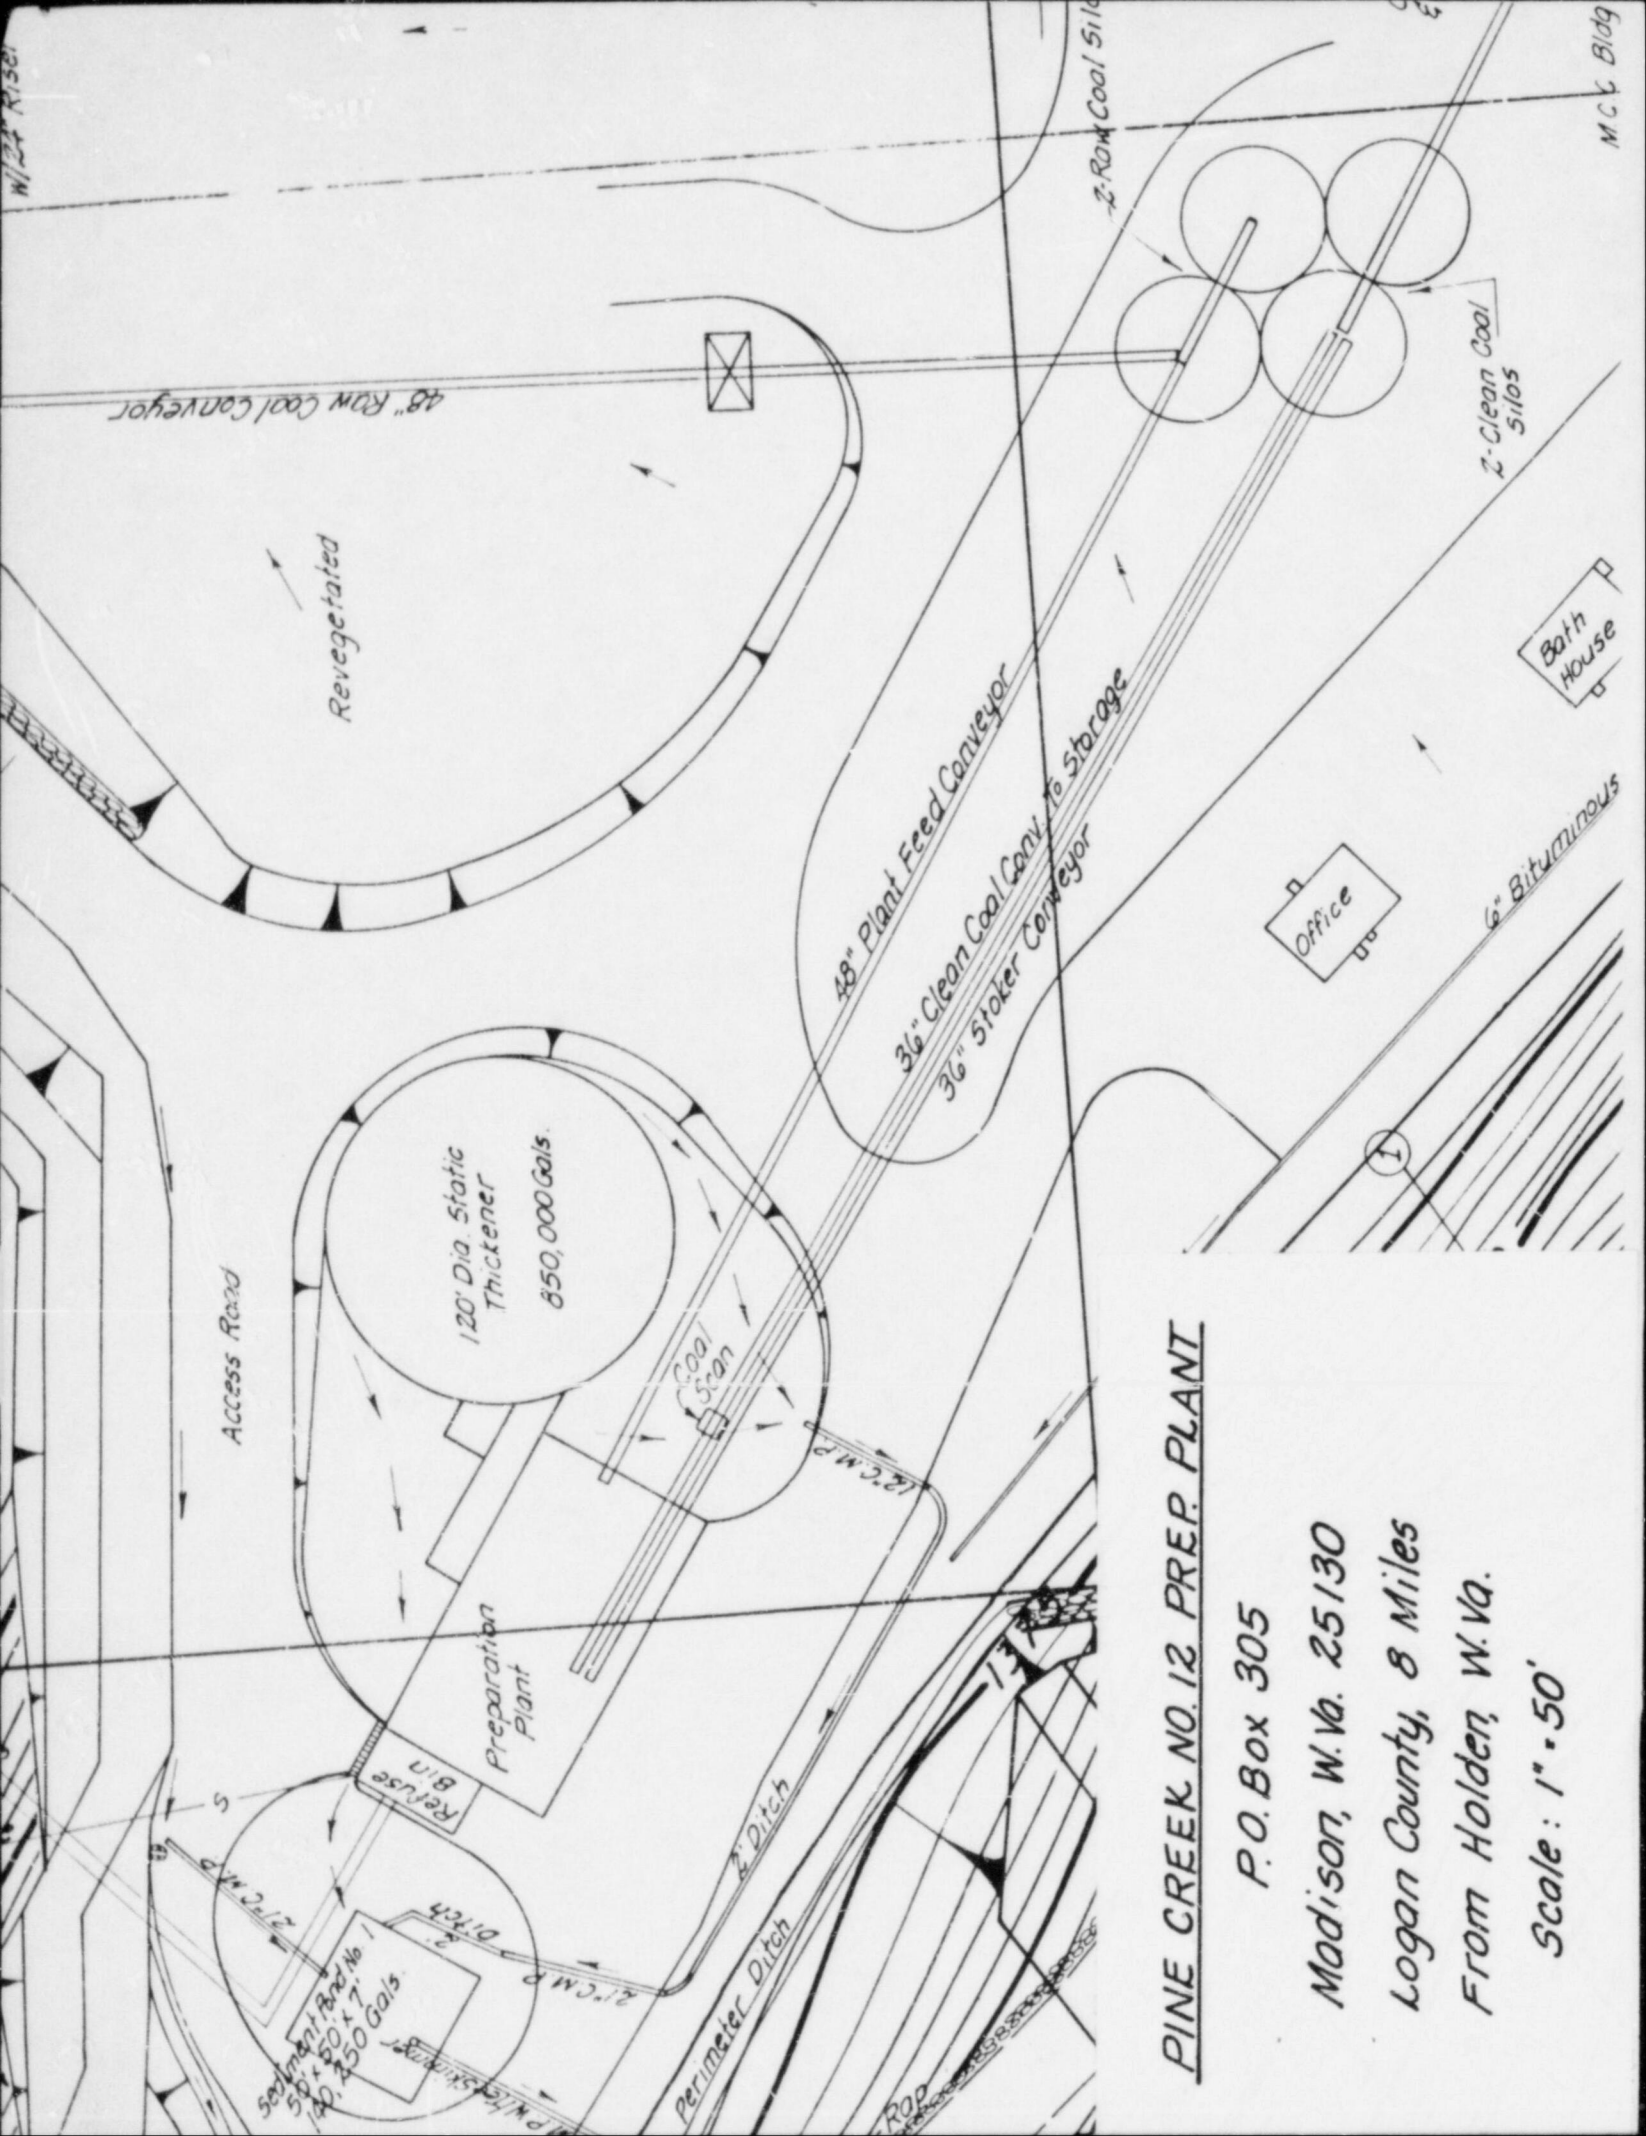

Kenneth G. Woodring
President
