Docket No. 50-410

Niagara Mohawk Power Corporation  
ATTN: Mr. C. V. Mangan  
Senior Vice President  
300 Erie Boulevard, West  
Syracuse, New York 13202

Gentlemen:

Subject: Inspection Report No. 50-410/86-44

This report forwards the findings of the Emergency Preparedness Implementation Appraisal followup of Nine Mile Point Nuclear Plant Unit-2, which was conducted August 4-6, 1986, by Mr. W. Thomas and others of this office at Nine Mile Point Nuclear Plant, Scriba, New York.

Areas examined during this inspection are described in the NRC Region I Inspection Report enclosed with this letter. This appraisal consisted of selective examinations of procedures, representative records, facilities and equipment, interviews with personnel, and observations of the inspectors.

During the previous inspection, our inspectors identified an area in which your established Emergency Plan deviates from the guidance of NUREG-0654, in that the Technical Support Center (Site Emergency Director) exercises control over both on and off-site actions.

As a result of our review of your actions concerning this matter, this item is satisfactorily resolved.

Within the scope of this inspection, no violations were identified and no response to this letter is necessary. One item requiring corrective action is identified in Section 5 of this report, along with the corrective actions necessary prior to low-power and full-power license for this item.
