Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 50-395/86-14

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by P. T. Burnett on July 28 - August 1, 1986. The inspection included a review of activities authorized for your V.C. Summer facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

Within the scope of the inspection, no violations or deviations were identified.

It is our understanding, based upon discussions during the exit interview on August 1, 1986, that you no longer use the 5CALS computer program to determine thermal power. Also, you have agreed to inform the NRC if you intend to re-instate the use of the 5CALS or similar program at least 30 days prior to implementation. Please inform this office if your understanding differs from ours.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and its enclosure will be placed in the NRC Public Document Room.
