Atlanta, GA 30302

Gentlemen:

SUBJECT: NOTICE OF VIOLATION AND NOTICE OF DEVIATION  
(NRC INSPECTION REPORT NOS. 50-424/86-59 AND 50-425/86-26)

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by W. P. Kleinsorge on July 7-18, 1986. The inspection included a review of activities authorized for your Vogtle facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The inspection findings indicate that certain activities appeared to violate NRC requirements and other activities appeared to deviate from commitments to the NRC. The violations and deviations, with pertinent references and elements to be included in your response, are described in the enclosed Notices.

In addition to the need for corrective action regarding the specific matters identified in the enclosed Notices, we are concerned about the implementation of your Quality Assurance Program that permitted this situation to develop and by the fact that these items were not identified by your Readiness Review Program. Consequently, your response should describe those particular actions taken or planned to improve the effectiveness of your programs.

Your attention is invited to unresolved items identified in the inspection report. These matters will be pursued during future inspections.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and its enclosures will be placed in the NRC Public Document Room.
