RE: Control No. 77520

Dear Pat:

Enclosed please find a sketch showing the location where our nuclear density meter is stored. The walls of the storage vault are 8" thick concrete block with the voids filled with concrete. The floor and ceiling are reinforced concrete. The door to the vault is fire-proof steel and is locked when unattended. In addition, access to the vault itself is restricted.

Within the vault, the meter is kept in a padlocked case at all times. The case is stored on a heavy metal shelf over 7' above the floor where it is not easily accessible.

I hope this is the information you need. If you have any further questions or comments, please contact me at this office.

Yours very truly,

VALLEY CONSTRUCTION COMPANY

Re: Moil Control No. 05098,  
Request for renewal of License #12-16694-01

Dear Sir:

In response to your request, we are submitting the following additional information.

1. Duties and responsibilities of the Radiation Protection Officer
  - a. To see that no unauthorized personnel operates the gauge.
  - b. Maintain leak test records, film badges, and proper license.
  - c. To maintain records of the location of the gauge.
  - d. To insure proper storage of the gauge.
  - e. To notify the proper authorities in case of damage or theft.
2. Disposal of gauge-If the gauge is to be disposed of, it will be transferred to another licensee, returned to the manufacturer, or if damaged, disposed of according to NRC regulations.
3. Means of preventing unauthorized use and/or removal of gauge
  - a. At the home office, the gauge will be stored in a locked cabinet, away from normal work stations and only authorized users will have keys.
  - b. At field offices having lockable cabinets, the above procedures will be followed.
  - c. For temporary assignments away from the home office where no lockable cabinet exists, the gauge will be secured to an unmovable object by means of a chain and padlock. In this case, the instrument case itself will be locked.
  - d. When in a vehicle, the vehicle will be locked whenever unattended.

COPIES SENT TO OFF. OF  
INSPECTION AND ENFORCEMENT

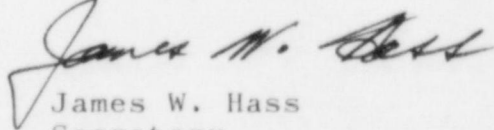

8102260393 2pp.

4. Emergency procedures

- a. In the event of fire or damage to the nuclear gauge, the location of the gauge will be immediately isolated.
- b. Local law enforcement, Civil Defense and Department of Health will be immediately notified by our Radiation Safety Officer.
- c. If after examination of the site with a survey meter, it is found "clean" and the source and shield are in tact, the gauge will be removed and shipped to the manufacturer for repair or disposal.
- d. If there is leakage or the source or shield are damaged, the NRC and/or the gauge manufacturer will be contacted and requested to provide expert personnel for disposal of the source.
- e. If the gauge is stolen, all of the agencies named above will be notified immediately.

If there should be any further questions, please do not hesitate to contact me.

Very truly yours,

  
James W. Hass  
Secretary
