Gentlemen,

I wish to request an ammendment to my N.R.C. license #21-19345-02, which will change the stated 6 month calibration frequency of my survey meter to a yearly calibration frequency. The meter has shown itself to be stable over long periods, and the 6 month calibration results in unnecessary expense, loss of usage time, and possible damage in shipping. I do not feel that this change will compromise the efficiency of our health physics program and in fact should improve it.

Sincerely,

Thomas J. Kregoski
President, Diagnostic Reagents
