Glen Ellyn, Illinois 60137

RE: Control #04594

Dear Dr. Mallett:

In response to your inquiry for additional information for our new institutional byproduct material license application, the following is respectfully submitted:

1. We requested Radiology Associates, Ltd. (Belleville, Illinois) to submit an amendment application to delete St. Clement Hospital from their License #12-18549-01.
2. Gregario Sierra, M.D., Pathologist, has been appointed to the membership of the Medical Isotope Committee.
3. The dose calibrator will be checked to within 5% of the accuracy of the calibration standards, rather than 10%.
4. In accordance with 10 CFR 20.501, authorization is being requested to dispose of the following records following any NRC inspection of these records:
  - A. Dose calibrator accuracy, constancy and linearity checks.
  - B. Survey meter calibration records.
  - C. Instrument calibration and quality control records.
  - D. Records of training for occupational and non-occupational personnel.
  - E. Minutes of meetings of the Medical Isotope Committee and/or Radiation Safety Committee.

5. Please delete procedures referring to brachytherapy treatment. We do not anticipate using radioactive sources for brachytherapy at this time.
6. Please include the authorization to transfer radioactive waste to a central radiopharmacy, i.e. Pharmaco Nuclear Inc., St. Louis, Missouri. The transfer of radioactive material will be performed via the central radiopharmacy's courier. The waste will be placed in their original shipping containers.

Sincerely,
