Dear Secretary:

I am absolutely opposed to the building of a temporary nuclear storage facility in Tennessee. It simply isn't necessary. If, the wishes of the Tennessee public are ignored, and the dump is installed anyway, we want it to be safe. In the interest of our safety, I urge you to consider that two licenses be required before any waste can be accepted. The first license should guarantee that the plant is built to the proper specifications and is completed within these safety guidelines. The second license that should be required would allow for the plant to be inspected before any waste can be accepted.

The building of this plant could mean jeopardizing our personal welfare and safety. It will certainly drive away much more investment than it will bring in. With the driving away of investment, will go many jobs. Our Governor's Safe Growth Team say that we will lose more jobs than we will gain. The Safe Growth Team also reveals that Tennesseean's will spend a lot of tax money to make sure that waste is brought into our state safely.

I urge you strongly to find other methods of disposal. A temporary storage facility is a horrible waste of money. Please look for ways to dispose of the nuclear waste permanently. I ask you not to spend my taxes on temporary fixes.

Sincerely,
Lisa Hanson
