Dear Mr. Trottier:

This is in response to your letters to our Region III and Washington Offices dated February 25, 1986 requesting a license to possess and distribute iron sight inserts obtained from Amson, Inc. In order to continue review of your license application the supplemental information listed below is required:

1. A drawing of the facility where you intend to install the sights, and store the sights that have not been installed.
2. The method of disposal for damaged sights (returning damaged sights to Amson will be considered proper disposal).
3. The means of storing and securing the sights against unauthorized access.
4. A description or sample of the label and the location of label on finished product.
5. Emergency procedures that will be followed if a sight is broken. Procedures should include evacuation and ventilation of room affected for at least 30 minutes.
6. A copy of the actual instructions to be used for installation and labelling. Instructions should specifically state the type adhesive to be used and the size holes to be drilled where sights will be mounted. Any variance from the materials or procedures supplied by Amson should be justified.
