OFFICE OF SECRETARY
DOCKETING & SERVICE
BRANCH

Secretary
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

This is to register my objection to any increase in the permissible intake of radiation.

Not only do I object to allowing an increase, I object to the amount that is now allowed and considered safe. As we know there is no safe dosage of radiation. That is why "permissible" is used instead of "safe." Working toward a decrease, not an increase, in this amount is of the utmost importance.

I would urge that public hearings be held prior to any change in existing standards. I believe the public becomes more concerned about this problem as they are becoming more aware of the hazards of radiation by reading about accidents and leaks. Many of us have long been concerned about the dangers, while the majority have waited for the accidents to make this danger real to them.

Yours truly,

Jeanne B. Hickman

JACKET NUMBER
PROPOSED RULE PR-1920, 30 etal.
(50 FR 51992) (593)

Oct. 6, 1986

I request that public hearings be held + an environmental impact statement be issued in the matter of the ~~the~~ Nuclear Regulatory Commission's proposal to ~~not~~ increase ^{approved} intake of radiation + in retaining the present 5r/500mc limit on radiation exposure - it needs to be lowered, not increased.

Sincerely,

Caroline Martin
