(CDR-85-00-13)", J. DeVincentis to R. W. Starostecki

Subject: Service Water System Lining Inspection; Additional  
Information

Dear Sir:

Pursuant to Reference (b), an internal inspection of the lining in the Service Water System was performed on September 18, 1986. This inspection did not identify any local defects or overall wear on the pipe coating. Since the system had operated for approximately 3,960 hours prior to this inspection and because the internal conditions were found highly satisfactory, no further inspections are scheduled prior to coreload. The next internal inspection is scheduled for the first refueling outage as was previously indicated in Reference (c).

We will keep the NRC Resident Inspector apprised of the schedule of the next inspection and its results as was done with the September 1986, inspection. As such, no further formal reports regarding future lining inspection are anticipated.

Very truly yours,

8610240306 861015
