 U.S. NUCLEAR
 REGULATORY
 COMMISSION

Michael T. Masnik
 Three Mile Island Cleanup Project Directorate
 Office of Nuclear Reactor Regulations
 US Nuclear Regulatory Commission
 Washington, DC 20555

Dear Mr. Masnik:

Three Mile Island Nuclear Station, Unit 2 (TMI-2)
 Operating License No. DPR-73
 Docket No. 50-320
 Comments of Draft Supplement 2 to the
 Programmatic Environmental Impact Statement - Three Mile Island Unit 2

GPU Nuclear letter 4410-87-L-0032 dated March 17, 1987, provided comments on Draft Supplement 2 to the Programmatic Environmental Impact Statement - Three Mile Island Unit 2 (PEIS). Our purpose in providing those comments was to clarify, for the record, the differences in methodologies used by the NRC and GPU Nuclear in arriving at similar off-site dose consequence conclusions as published in the PEIS and GPU Nuclear letter 4410-86-L-0114 dated July 31, 1986, respectively. Coincidentally, the comments provide a basis to respond to inquiries concerning the variations in the published dose estimates. However, it is essential that the record reflect GPU Nuclear's unqualified endorsement of the NRC conclusion that disposal of the accident-generated water can be accomplished without incurring significant environmental impact.

Sincerely,

/s/ F. R. Standerfer
