Docket No. 40-8697
SUA-1338, Amendment No. 13
04008697350E

Rocky Mountain Energy Company
ATTN: Michael Neumann
Senior Licensing Specialist
10 Longs Peak Drive, Box 2000
Broomfield, Colorado 80020

Gentlemen:

The staff of the Uranium Recovery Field Office, USNRC, has reviewed your submittal dated August 13, 1986 entitled, "Decommissioning Report for the Reno Creek R&D In Situ Leach Project." In addition, the staff has reviewed the certificate of Disposition of Materials (USNRC Form 314) submitted by letter dated September 4, 1986. A final site inspection was performed on August 15, 1986. This inspection indicated that the decontamination and decommissioning of the site was in accordance with Source Material License No. SUA-1338 and applicable USNRC requirements.

As stated in the above cited report and as verified by the USNRC, the process and generator structures remain on site along with the former restricted area fence and an outdoor acid storage tank and water storage tank. The USNRC is, however, assured that all byproduct material resulting from the licensed activities has been removed and transferred to an appropriately licensed disposal facility in conformance with the requirements of Source Material License SUA-1338. Site cleanup to acceptable standards was verified by the USNRC through independent gamma exposure rate measurements, smear surveys and soil samples. Therefore, title to the land may remain with the private land owner as allowed by Section 83 of the Atomic Energy Act of 1954, as amended.

The USNRC finds that your submittals complied with the requirements of 10 CFR 40.42. Additionally, no environmental impact has resulted from the decommissioning activities. The Finding of No Significant Impact published in the Federal Register on October 17, 1986 supports the
