Mr. Noah M. Shopenn, Radiation Specialist  
Technical Program Branch  
U.S. Nuclear Regulatory Commission  
Region IV  
611 Ryan Plaza Drive  
Arlington, Texas 76011

Dear Mr. Shopenn:

Enclosed is our evaluation of the Kerr-McGee stack sampling procedure as requested under RFTA #RS-RIV-1-83, dated July 7, 1983. Our conclusion, based on the limited data provided, is that the procedure appears adequate for this particular application. I have suggested several minor changes to the system that I believe will give the procedure a better technical basis and will improve its reliability under varying stack exhaust conditions.

If you have any questions concerning this matter, please contact me at 615-576-3305 (commercial) or 626-3305 (FTS).

Sincerely,

James D. Berger  
Program Manager  
Radiological Site Assessment Program
