November 3, 1986

Director of the Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Sir:

Reference: Westinghouse Letter Dated September 29, 1986
From A. J. Nardi To USNRC

Westinghouse has reconsidered its request for an exemption from conversion from the use of High Enriched Uranium fuel for the Westinghouse Nuclear Training Reactor (NTR), Facility License R-119, Docket Number 50-87 which was submitted by the above referenced letter. Instead of the requested exemption, Westinghouse will annually submit a statement of certification concerning the availability of suitable fuel and funding from the U. S. Department of Energy to permit the conversion of the NTR to a Low Enriched Uranium (LEU) core.

Very truly yours,

A. J. Nardi, Manager
ES License Administration
