Arlington, TX 76012

SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION (CPSES)
DOCKET NOS. 50-445 AND 50-446
SMALL BREAK LOCA MODE 4 OPERATIONS
SDAR: CP-86-41 (INTERIM REPORT)

Dear Mr. Johnson:

On May 28, 1986, we verbally notified your Mr. I. Barnes of a deficiency involving small break LOCA evaluations regarding the effects of the operational status of plant equipment during Mode 4 operations. This is an interim report of a potentially reportable item under the provisions of 10CFR50.55(e). We have submitted interim reports logged TXX-4876 and TXX-4959, dated June 26, 1986, and August 13, 1986, respectively.

The Westinghouse Owners Group, of which TUGCO is a member, accepted a program designed by the WOG Analysis Subcommittee to address this concern at their September, 1986 meeting. The projected schedule outlines an April, 1987 completion date. Allowing for a reasonable delay time in distributing the conclusions from the subcommittee to all affected parties, we anticipate submitting our next report on this issue by June 12, 1987.

Very truly yours,

A handwritten signature in cursive script, appearing to read "W. G. Council".
