Thomas T. Martin, Director  
Division of Engineering and Technical Programs  
U. S. Nuclear Regulatory Commission  
Region I  
631 Park Avenue  
King of Prussia, PA 19406

Dear Mr. Martin:

This letter is a request to amend NRC ByProduct Materials License No. 06-4499-01. We request that the amendment apply to licensed activities which are currently carried on at 10 Washington Avenue, Bridgeport, CT, 06604.

We are closing the Nuclear Medicine operation at 10 Washington Avenue, and moving the clinic to the Commerce Park Professional Center at 4699 Main Street, Bridgeport, CT, 06606. This move will take place on or about December 1, 1984. A closeout survey will be performed at 10 Washington Avenue when the operations have been concluded there.

A drawing showing the location of the Nuclear Medicine Clinic in the new location is enclosed. The drawing includes details of the laboratory which will be used for receipt of radioactive materials, dose preparation, and storage of waste materials until background levels are reached.

Radiopharmaceuticals in precalibrated doses will be obtained from Syncor. The doses are delivered in a shielded briefcase, with each dose in its own syringe shield. Doses will be stored in these syringe shields until administered to patients. Unused doses and empty syringes from the previous day are picked up by a Syncor courier each day, when the daily doses are delivered. The radiopharmaceutical dose exchange is done via a locked box, bolted to the floor, just inside the locked main entrance to the building.

All other conditions of NRC License #06-4499-01 will still apply to operations at the new location. A check for \$120.00, to cover the cost of the amendment, is enclosed.

Sincerely,

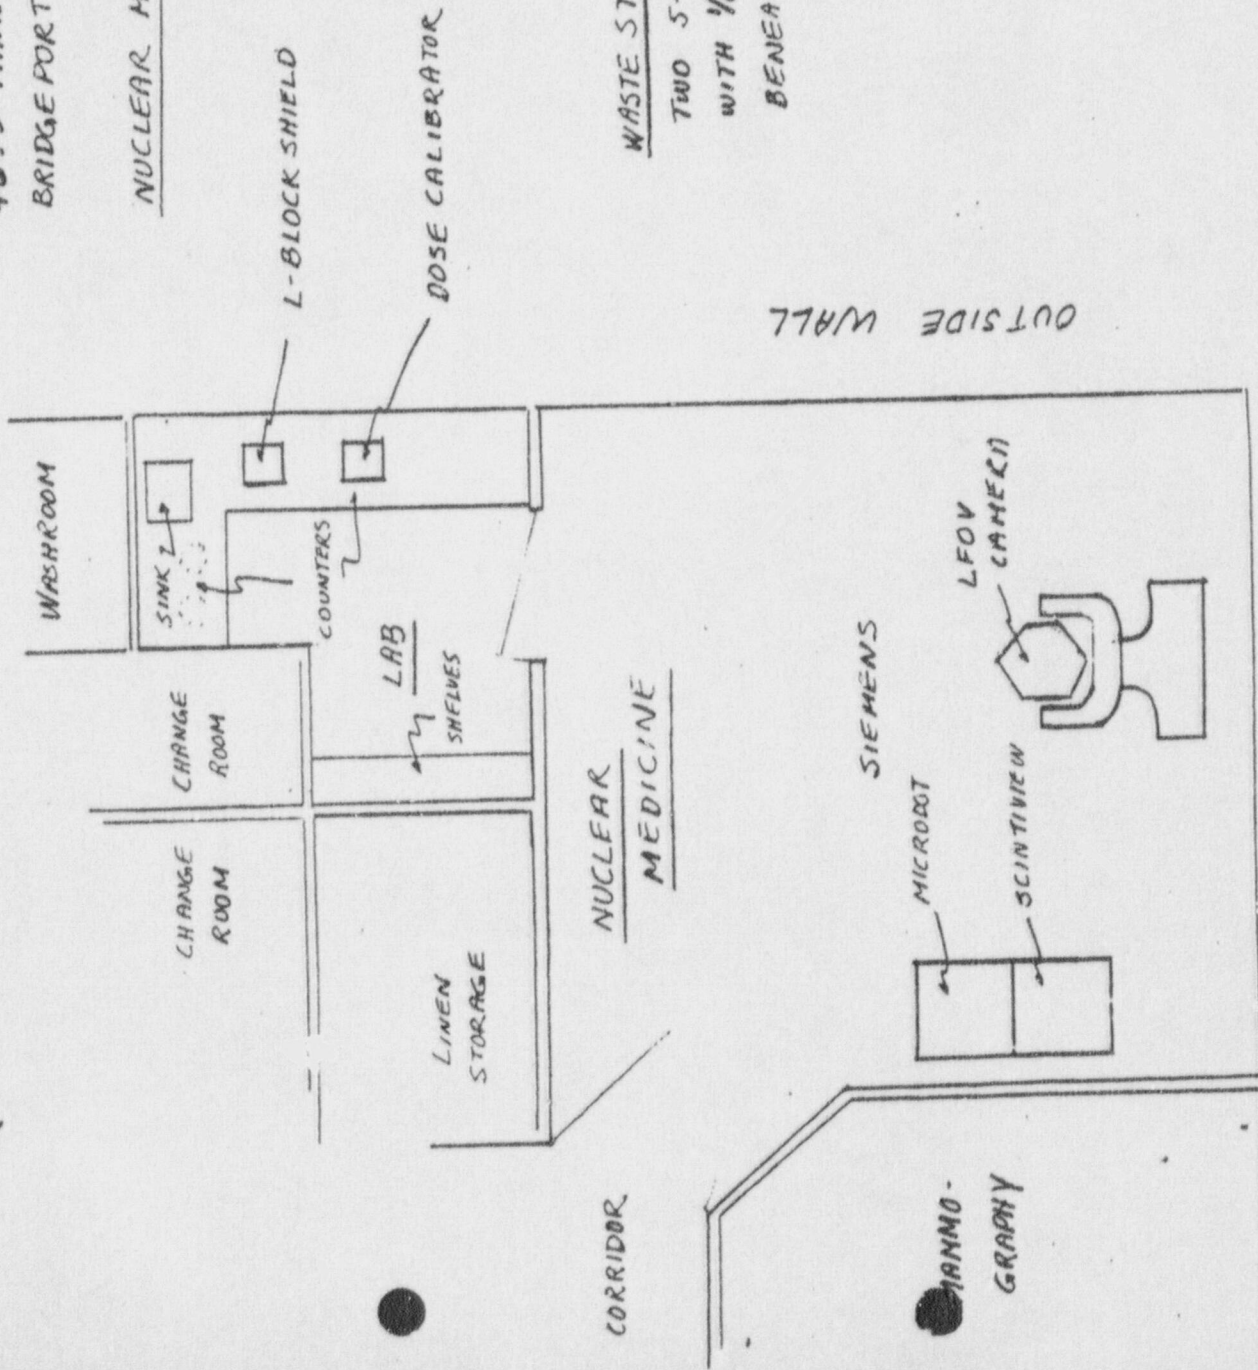

Robert D. Russo, M. D.
