

## NOTICE OF VIOLATION

South Carolina Electric & Gas Company  
V. C. Summer Nuclear Station

Docket No. 50-395  
License No. NPF-12

During an NRC inspection conducted on February 22 through April 4, 1998, a violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedures for NRC Enforcement Actions," NUREG-1600, the violation is listed below:

Technical Specification 6.8.1. requires, in part, that written procedures shall be established, implemented and maintained for applicable procedures in Appendix A to Regulatory Guide 1.33, Revision 2, 1978. Appendix A, paragraph 1.a., specifies procedures for Security and Visitor Control.

Security Plan Procedure-202, "Vehicle Access Requirements," Revision 11, paragraph 5.3.3.A.1.2).c), states that when a security officer conducts a search of a vehicle, the security officer is to ensure that neither the operator nor the accompanying personnel are provided access to any portion of the vehicle until the vehicle search is completed.

Contrary to the above, on March 19, 1998, a security officer failed to ensure that neither the operator nor the accompanying personnel were provided access to any portion of the vehicle until the vehicle search was completed. A searched and cleared individual went from the vehicle access portal search building directly to an unsearched vehicle and began to unload material from the vehicle.

This is a Severity Level IV violation (Supplement III).

Pursuant to the provisions of 10 CFR 2.201, South Carolina Electric & Gas Company is hereby required to submit a written statement or explanation to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555-0001 with a copy to the Regional Administrator, Region II, and a copy to the NRC Resident Inspector at the V. C. Summer Nuclear Station, within 30 days of the date of the letter transmitting this Notice of Violation (Notice). This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation, or, if contested, the basis for disputing the violation or severity level, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. Your response may reference or include previously docketed correspondence, if the correspondence adequately addresses the required response. If an adequate reply is not received within the time specified in this Notice, an order or a Demand for Information may be issued as to why the license should not be modified, suspended, or revoked, or why such other action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.

If you contest this enforcement action, you should also provide a copy of your response to the Director, Office of Enforcement, United States Nuclear Regulatory Commission, Washington, DC 20555-0001.

Because your response will be placed in the NRC Public Document Room (PDR), to the extent possible, it should not include any personal privacy, proprietary, or safeguards information so that it can be placed in the PDR without redaction. If personal privacy or proprietary information is necessary to provide an acceptable response, then please provide a bracketed copy of your response that identifies the information that should be protected and a redacted copy of your response that deletes such information. If you request withholding of such material, you must specifically identify the portions of your response that you seek to have withheld and provide in detail the bases for your claim of withholding (e.g., explain why the disclosure of information will create an unwarranted invasion of personal privacy or provide the information required by 10 CFR 2.790(b) to support a request for withholding confidential commercial or financial information). If safeguards information is necessary to provide an acceptable response, please provide the level of protection described in 10 CFR 73.21.

Dated at Atlanta, Georgia  
this 4th day of May 1998
