This supplement reports four new reportable events discovered during the review of Generic Letter 96-01 associated with Technical Specification Surveillances. These new issues are also addressed in the above referenced correspondence as requests for enforcement discretion and/or requests for a related Operating Licence amendment.

Whereas the Generic Letter reviews are nearing completion, TU Electric will issue an additional supplement to this LER to address the root cause and actions related to these specific events and other issues identified during this review in approximately 60 days.

This communication contains no new licensing basis commitments regarding CPSES Units 1 and 2. Should you have any questions or require additional information, please contact Obaid Bhatti at (254) 897-5839 to coordinate this effort.

Sincerely,

C. L. Terry
