Gentlemen:

VIRGINIA ELECTRIC AND POWER COMPANY
NORTH ANNA POWER STATION UNITS 1 AND 2
UPDATED FINAL SAFETY ANALYSIS REPORT
REVISION 33

Pursuant to 10 CFR 50.71(e), Virginia Electric and Power Company submits Revision 33 to the Updated Final Safety Analysis Report (UFSAR) for North Anna Power Station. This revision updates only Chapter 17 of the UFSAR which contains the Operational Quality Assurance (QA) Program and contains all changes to Chapter 17 since the last update. These changes to the program description do not reduce the commitments contained therein. This revision is being made at this time to support the licensing of the North Anna Independent Spent Fuel Storage Installation.

Two of the specific changes included are the use of optical disks for document storage and the clarification of the use of summary reports for inservice inspection quality assurance records. As discussed in the NRC counterparts meeting on March 12, 1998, Virginia Power has begun storing quality assurance records in electronic form on optical disks. This method of storage meets the intent of Generic Letter 88-18, dated October 20, 1988. Also, the summary report of the inspection of steam generator tubing during inservice inspections will be treated as the quality assurance record documenting the results of the inspection.

One signed original and ten copies of Revision 33 to the UFSAR are enclosed. Each revision package contains replacement instructions for existing pages.

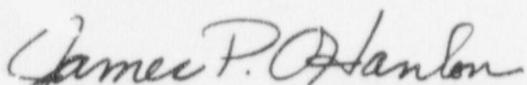

As a duly authorized officer of the Virginia Electric and Power Company, I hereby certify that the information given in the enclosed Revision 33 of the UFSAR

9804170002 980409
PDR ADOCK 05000338
K PDR

4/11

accurately presents changes to Chapter 17 since the UFSAR was last updated.

Very truly yours,

James P. O'Hanlon
Senior Vice President - Nuclear

COMMONWEALTH OF VIRGINIA)
)
COUNTY OF HENRICO)

The foregoing document was acknowledged before me, in and for the County and Commonwealth aforesaid, today by J. P. O'Hanlon, who is Senior Vice President - Nuclear, of Virginia Electric and Power Company. He has affirmed before me that he is duly authorized to execute and file the foregoing document in behalf of that Company, and that the statements in the document are true to the best of his knowledge and belief.

Acknowledged before me this 9th day of April, 1998.

My Commission Expires: May 31, 1998.

Vicki L. Hull
Notary Public

NORTH ANNA POWER STATION UNITS 1 AND 2 UFSAR REVISION 33 INSTRUCTIONS

These instructions apply for implementing Revision 33 of the North Anna Updated Final Safety Analysis Report (UFSAR). The UFSAR update package consists of:

- (1) Instruction Sheet
- (1) Revision Summary
- (1) List of Effective Pages
- (1) Section 17.2 Replacement Pages

UPDATE INSTRUCTIONS

1. In Volume I, remove and discard the *Revision Summary* (Revision 32—2/11/98).
2. Insert the enclosed *Revision Summary* (Revision 33—3/31/98) Replacement Pages.
3. In Volume I, remove and discard the entire *List of Effective Pages* (Revision 32—2/11/98).
4. Insert the enclosed *List of Effective Pages* (Revision 33—3/31/98).
5. In Volume IV, remove and discard the entire contents of *Section 17.2* (Revision 32—2/11/98) (i.e., all pages following Tab 17.2).
6. Insert the enclosed *Section 17.2* (Revision 33—3/31/98) Replacement Pages.
7. In Volume I, initial and date the *Record of Changes & Revision Summary* to reflect completion of these instructions.

REVISION SUMMARY

Revision 33

Section	Changes
17.2, 17.2.1.2, 17.2.2.1, 17.2.3, 17.2.4, 17.2.5, Figure 17.2.1-1, and Table 17.2-0	Deleted reference to the Nuclear Operations Department Standards and replace with Nuclear Business Unit Standard. Added position of Project Manager (Configuration Management).
17.2.1.1 and 17.2.1.2	Clarified organizational position descriptions by noting responsibilities for the ISFSI as they already exist.
17.2.1.2, Figure 17.2.1-2, and Figure 17.2.1-3	Deleted the position of Supervisor Administrative Services in the Nuclear Management organization and assigned duties and responsibilities to other positions.
17.2.2.6 and 17.2.2.8	Provided clarification of Quality Inspection Coordinator qualifications.
17.2.17, Tables 17.2-2 and 17.2-3	Added Generic Letter 88-18 commitment regarding storage of quality assurance records on optical disk media.
Table 17.2.0	Added provision for storage of quality assurance records in an approved offsite facility.
Table 17.2-0	Provided an additional alternative to ANSI/ANS 3.1.
Tables 17.2-2 and 17.2-3	Clarified the description of onsite and offsite nuclear safety review committees.

Revision 32

Section	Changes
Foreword	Updated to reflect recent NRC initiatives regarding UFSAR submittal requirements, and adequacy and consistency of design basis information; and to note Virginia Power's adoption of electronic methods to enhance UFSAR maintenance, and UFSAR distribution in both hardcopy and electronic media.
Tables 3.9-1 & 3.9-2	Updated to reflect current plant configuration.
3.10.2 & 3.10.3	Deleted references to Virginia Power Engineering standards STD-CEN-0020, STD-CEN-0026, and STD-GN-0038

Revision 32 (continued)

Section	Changes
4.1	Revised to indicate that fuel assemblies may be used that differ from those described in the UFSAR—with an NRC-approved exemption or license condition.
4.2.3	Revised to reflect removal of secondary neutron sources starting with the Unit 1 Cycle 13 reload core; secondary source replacement in future reloads is optional.
5.2.4.1.1	Eliminated seismic qualification requirements for the Containment Gaseous and Particulate Radiation Monitoring System. Added procedural requirements for system operability verification after a seismic event.
6.2.1.2.18	New section to describe lead blanket shielding storage boxes, explain why they are not designated Seismic Category I, and provide references to drawings that depict storage box locations.
7.2.2.2.1.7	Revised reactor trip breaker test procedure.
7.2.2.3.5	Added discussion of IEEE-279 control and protection interaction criteria as they apply to steam generator low level/high steam-feed flow mismatch trip channels.
8.3.1.1	Clarified the "C" containment air recirculation cooler fans operating description.
9.3.4.2.2.3	Clarified that the mixed-bed demineralizer may be removed from service if primary coolant activity is within normal limits.
9.5.3	Added High Pressure Sodium among types of non-containment normal lighting.
9.5.4.2	Revised duration of full-load operation with minimum allowed day tank inventory.
13.7	Deleted references to Regulatory Guide 1.17 and Section 2.790. Added references to 10 CFR 73, Sections 21, 55, 56, 57, and Appendices B & C.
15.2.12	Revised to reflect reanalysis to support Virginia Power's Accident Analysis Design Basis Document project.
15.2.14	Revised to reflect the results of an extended Virginia Power evaluation of the "Spurious Operation of the Safety Injection System at Power" event.
15.4.3.1	Deleted paragraphs that referred to the configuration of steam generators just before the repair project that included replacement of the tube bundles.
Table 17.2.0	Deleted reference to the Surry Training Center records vault.

Revision 32 (continued)

Section	Changes
Tables 17.2-2 & 17.2-3	Corrected typos. Clarified record retention requirements.
All (no change bars)	<ul style="list-style-type: none">• Consolidated 17 volumes to 8 volumes• Referenced Station Drawings previously included in UFSAR; inserted simplified diagrams• Removed notations associated with previously deleted material and renumbered sequentially• Renumbered previously inserted items that had suffixes (e.g., 4A, 4B)• Applied consistent typeface and page layouts• Improved consistency of measurement notation (e.g., time, mass, velocity), including abbreviations
