ATTN: Mr. John W. Lubinski, Mechanical Engineer

SUBJECT: Tritium Illuminated Gun Sights License Information
Our License: HESCO - #10-23564-01E

1. Please find herein updated information regarding our tritium illuminated night sights. While there are no changes to the scope of the license (our annual distribution remains around 4000 Ci) or to its contents, we have once again expanded the number of models for which we supply tritium illuminated gunsights. As agreed upon in the past, since we have made only small modifications to the cosmetic appearance of the various metal sight housings, we are notifying you of the additional model numbers to be covered under the renewed license. One new "typical drawing" has been added to represent the family of optical reflex sights discussed with you during your last meeting with Scopus Light.
2. Enclosed is a new listing of our ML numbers and their descriptions, an updated Guide to Tritium Light Sources, an updated Summary Table and an updated Cross Reference List identifying those different model types for which our license and amendments were issued, and showing the model numbers of sights which qualify for incorporation under the license by virtue of similarity. The submission includes:

One) Cross Reference List: Updated version of the listing which has been used for all previous licenses and amendments. It is arranged by groupings of sight models per NRC Device number.

Two) ML Listing and Descriptions: A descriptive list of each night sight model arranged numerically by model number. The list describes the sight and the weapon on which it is designed to be used.

Three) Summary Table: A table showing the various models categorized by each NRC Device Number, with "allowed by license" and actual amounts of tritium, and codes depicting the type of mounting to the weapon and the type of installation used for the tritium light source.

9804060007 980303

PDR RC *

SSD

PDR

The codes used are alpha-numeric in nature with alpha prefix indicating how the tritium light source is installed, and the numerical suffix indicating how the sight mounts to the weapon. A description of the codes follows:

"A" represents light sources which are installed such that the end of the light is seen through the sight "window" when aiming the sight.

"B" represents light sources which are installed such that the side of the light is seen through the sight "window" when aiming the sight.

"1", "2", "3" and "4" represent sights which mount to the weapon via a dovetail, a screw, a pin, or the swaging of a tenon respectively.

As an example of the code, "A1" indicates a sight whose light is installed so that its end is viewed through the sight "window" when the weapon is being aimed, and which mounts by means of a dovetail.

Four) Drawing: A 14th drawing is provided to demonstrate the code for the optical reflex sight which is under license. The drawing is of an actual optical sight, is marked with the Code, and has a legend which provides dimensional information. The information provided is:

- Maximum and minimum length, width and height of all the sights in the particular group
- Actual nominal length, width and height of the specific representative sight (model number shown in the legend) being shown.
- The minimum protective distance "P" to the light source, from the closest outside spot on the sight. In this case, the metal housing encasing the light source.

Five) Guide to Tritium Light Sources: An updated listing of all Tritium Light Sources used in the sights. The list shows the activity per source, the model number and the manufacturer of the light source.

3. All sight housings are manufactured from metal. Some sights within the type "A" classification utilize a flexible or rigid plastic protective insert, between the light and the metal; and, some also have a crystal window to afford additional protection and more uniform light output. All sights utilize the MV glueing/sealing method as has been described in all our applications. The optical reflex sight depicted by the new drawing has one small (18 mCi) light source, encased in a cavity in the metal housing and encapsulated using the MV glueing/sealing method (all identical to the other gun sights). Then, at one end of the encapsulated light - and at a distance of 0.5 mm from it, a fiber optic is permanently afixed in position using the same MV glueing/sealing method. The light source is totally inaccessible to the user and, in fact, not even visible since the light output is carried to its imaging plane by means of the fiber optic. The sight is mounted to the weapon by means of screw clamp connection, either directly or by means of an adapter supplied with the sight.

4. To keep you abreast of developments in the OEM area, please be advised that during the year, approximately 10000 sets of sights (containing a total of around 380 Ci of tritium) were distributed directly to these OEMs. In keeping with our past discussions and agreements, we have provide these OEM with safety information for care and temporary storage of the sights, as well as specific installation ins'tructions for mounting the sights on their weapons.
5. If any additional information or clarification is required, please do not hesitate to contact us.

Best Regards,

Kerry L. Kinder

MEPROLIGHT ML LISTING & DESCRIPTIONS

<u>MODEL</u>	<u>DESCRIPTION</u>
ML-100	Archery pin - 8-32 thread size
ML-115O	Sight set for AR15/M16 with open rear sight (4-slot front)
ML-115P	Sight set for AR15/M16 with peep rear sight (4-slot front)
ML-200A	Sight set for S&W K, L, N frames w/adjustable sights
ML-260	Sight set for Beretta 92F, 92Fc with fixed sights
ML-400	Shotgun bead front sight - 6-48 thread size
ML-500	Universal front sight for fixed sight revolvers
ML-736	Sight set for S&W 3900, 4000 & 5900 series with adjustable sights
ML-740	Sight set for S&W 459, 659 with fixed rear sight
ML-745	Sight set for S&W 6900 series with fixed sights
ML-750	Sight set for S&W 645 with fixed sights
ML-755	Sight set for S&W 4506 with (non-Novak) fixed sights
ML-756	Sight set for S&W 4506 with adjustable rear sight
ML-760	Sight set for Beretta 92F, 92Fc with fixed sights
ML-768	Sight set for Jericho & Springfield pistols with dovetails
ML-770	Sight set for Colt series 70 pistols with .055 front tenon
ML-775	Sight set for Colt series 80 & 90 with .125 front tenon
ML-2768	Adjustable sight set for Jericho & Springfield pistols with dovetails
ML-10110	Sight set for Sig Sauer P220, P225, P226, P228 with fixed sights
ML-10129	Sight set for Sig Sauer P229 pistol with fixed sights
ML-10222	Sight set for Glock 20, 21 w/screw-on front
ML-10224	Sight set for Glock 17, 19, 22, 23 w/screw-on front
ML-10225	Sight set for Glock 17, 19, 22, 23 w/stake-on front
ML-10226	Sight set (Novak style) for Glock compact pistol w/screw-on front
ML-10662	Sight set for Beretta 92F series pistols with fixed sights
ML-10663	Sight set for Beretta Cougar pistol
ML-10664	Sight set for Beretta Brigadier pistol
ML-10665	Sight set for Beretta Stock pistol
ML-10735	Sight set for S&W 5904, 5906 w/fixed sights (Novak to S&W)
ML-10755	Sight set for S&W 4506 w/fixed sights (Novak to S&W)
ML-10771	Sight set for Colt Gov't series pistols with .055 front tenon
ML-10774	Sight set for Colt 2000 pistol
ML-10775	Competition sight set for Colt Gov't pistols
ML-10776	Sight set for Colt Gov't series with .125 front tenon
ML-10785	Sight set for Browning Hi-power MKIII w/dovetail sights (to Browning)
ML-10882	Sight set for Browning Hi-power with fixed sights
ML-10884	Sight set for Browning "BDM"
ML-10885	Sight set for Browning Hi-power MKIII with dovetail sights
ML-10990	Sight set for Ruger P-85 or P-89 pistols with fixed sights
ML-10991	Sight set for Ruger P-90 or P-91 pistols with fixed sights
ML-10994	Sight set for Ruger P-94 pistols with fixed sights

MEPROLIGHT®

<u>MODEL</u>	<u>DESCRIPTION</u>
ML-11515	Sight set for H&K P7-8 & P7-13 with fixed sights
ML-11516	Sight set for H&K USP pistol
ML-11517	Sight set for H&K USP compact pistol
ML-11735	Sight set for S&W 3rd Generation 3900, 5900 & 6900 series pistols
