

October 25, 1999

LICENSEE: Wisconsin Electric Power Company
FACILITY: Point Beach Nuclear Plant, Units 1 and 2
SUBJECT: MEETING BETWEEN THE WISCONSIN ELECTRIC POWER
COMPANY AND THE NRC STAFF REGARDING CONVERSION TO
IMPROVED STANDARD TECHNICAL SPECIFICATIONS

The NRC staff met with representatives from Wisconsin Electric Power Company (WE), the licensee for Point Beach Nuclear Power Plant (PBNP), Units 1 and 2, at NRC Headquarters on September 1, 1999, to discuss WE's planned conversion to improved standard Technical Specifications (ITS). Enclosure 1 lists the meeting participants. Enclosure 2 is an agenda containing items discussed during the meeting.

WE plans to submit a license amendment application to convert the current TSs to ITS in the fall of 1999 and has requested approval by the NRC in time to implement the ITS during the summer of 2001. WE discussed other items at the meeting, including submittal content, number of submittal copies needed by the NRC staff, examples of where WE will deviate from the standard TSs, and differences in PBNP design that could impact the NRC staff's review of the ITS submittal. The licensee and NRC staff agreed that future meetings between NRC staff reviewers and the licensee to discuss specific design differences in the auxiliary feedwater system, service water system, and electrical distribution system would benefit the review of WE's conversion to ITS. These future meetings will be scheduled after WE submits its license amendment application to convert to ITS.

Point Beach ITS Conversion Project Meeting with NRR

NRC Headquarters, White Flint, Maryland
September 1, 1999

- Proposed Schedule
 - Submittal
 - sections 3.3.1 & 3.3.2 re-write
 - sections 1, 2, 3 (Oct 99)
 - sections 4, 5 (Dec 99)
 - lengthened submittal period to improve document quality
 - Summer 2001 implementation window
 - refueling outage coordination
- PTLR/COLR Integration
 - PTLR submittal Jan 2000
 - COLR submittal Feb 2000
- Discuss Submittal Content and Number of Copies Needed
- Examples of CTS/CLB justification for deviation
 - e.g., power to SI accumulator isolation valves
- ITS Sections that deviate substantially from NUREG-1431
 - Auxiliary feedwater; service water; electrical
 - System overviews to be provided shortly after submittal
- Formatting Irregularities due to Software Conversion (font; spaces)
- Wrap-up/questions; reviewer requests
