

August 11, 1997

Mr. Delno Seitz
Buckeye Steel Castings Company
2211 Parsons Avenue
Columbus, OH 43207

Dear Mr. Seitz:

Your Quality Assurance Program Approval No. 0110 is hereby terminated. The Nuclear Regulatory Commission published a final rule, effective June 27, 1997, revising the requirements of 10 CFR Part 34, "Licenses for Industrial Radiography and Radiation Safety Requirements for Industrial Radiographic Operations." The revision, which contained numerous changes in the requirements, also modified the quality assurance (QA) requirements for transportation. As a result of these changes, a separate NRC QA program approval is no longer needed.

Specifically, transportation activities are now contained in a new paragraph, 10 CFR 71.101(g). This provision was added to the regulations and requires that inspection and maintenance programs limited to radiographic exposure devices, source changers, or packages transporting these devices and meeting the provisions of 10 CFR Part 34.31(b), or equivalent Agreement State regulations, satisfy the general license requirements specified in 10 CFR Part 71.12(b) for Type B transport packages.

There is no need for you to respond to this letter. If you have further questions, please contact Stephen O'Connor of my staff (telephone: 301 415-8561, e-mail: SCO@NRC.GOV).

Sincerely,

/ s /

John P. Jankovich, Section Chief
Transportation and Storage
