General Comment

Greetings, I am writing today to oppose the change of regulations that would allow the disposal of low-level nuclear waste in landfills. The original regulations that required disposal of low level nuclear waste to be treated like all other nuclear waste was based on good science and that requirement should be kept in place. Traditional landfills are not designed to safely store nuclear waste of any kind and should not be used to dispose of this waste. Even low level nuclear waste poses significant danger to the environment and for humans. I strongly oppose this rule change. thank you, Bob Ramlow, Amherst WI 54406
