Week Ending AUGUST 7, 2020

Staff Hosted Public Meeting with Oklo Power, LLC on the Aurora Custom Combined License Application

On August 4 and 5, 2020, the U.S. Nuclear Regulatory Commission (NRC) staff held a public meeting with representatives from Oklo Power, LLC (Oklo) to discuss maximum credible accident and classification of structures, systems, and components for the custom combined license application of the Aurora Reactor (Agencywide Documents Access and Management System (ADAMS) Accession No. ML20217L601). This meeting supported Step 1 application review activities that are intended to enable alignment between NRC staff and Oklo on the key safety and design aspects in the application and assist in developing the safety review schedule.

NuScale Submitted an Emergency Planning Zone Sizing Methodology Topical Report Revision

On August 4, 2020, NuScale submitted Revision 2 of their Emergency Planning Zone (EPZ) sizing methodology topical report (TR) (ADAMS Accession No. ML20217L422). NuScale stated the TR was updated to address comments from the NRC and the public, with major modifications associated with the single module screening criteria and defense-in-depth assessment. The updated TR includes a discussion of the NRC's ongoing emergency planning rulemaking, the approved methodology in the Tennessee Valley Authority's (TVAs) early site permit for the Clinch River Nuclear site, as well as the EPZ exemptions granted at recent decommissioning nuclear power reactor sites.

Staff Issued Closure Letter Related to a Petition Regarding the Employee Concerns Program Restructuring at Tennessee Valley Authority

On August 6, 2020, the NRC staff issued a closure letter to the petitioner of a Title 10 of the *Code of Federal Regulations* (10 CFR) Section 2.206 petition related to the Employee Concerns Program restructuring at TVA (ADAMS Accession No. ML20195A128). The purpose of the letter was to notify the petitioner that the NRC's Petition Review Board finalized its determination that the petition did not meet criteria to be accepted for further review, primarily because the NRC had already been engaged with TVA under different regulatory processes when the petition was received. The NRC continues to provide appropriate oversight of the safety-conscious work environment improvement effort at TVA. Additional information is available at ADAMS Accession No. ML19164A185.

Staff Approved Licensing Requests for Regulatory Relief Related to the COVID-19 Public Health Emergency

The NRC staff has reviewed and approved several licensing requests seeking temporary flexibilities to maintain the safe and secure operation of the U.S. nuclear fleet during the pandemic. A summary of approved licensing actions provided during this reporting period are summarized below. A complete list of licensing actions approved by the NRC in response to the COVID-19 public health emergency is available on the NRC public website at <https://www.nrc.gov/about-nrc/covid-19/reactors/licensing-actions.html>.

Licensing Request for Regulatory Relief Related to COVID-19

*Hope Creek Generating Station and Salem Nuclear Generating Station, Unit Nos. 1 and 2
(PSEG Nuclear LLC)*

Type	Subject	Incoming Request	Decision
Exemption	Select Requirements of 10 CFR Part 73, Appendix B, "General Criteria for Security Personnel"	07/21/2020 ML20204A724	08/03/2020 ML20204A937

LaSalle County Station, Units 1 and 2 (Exelon Generation Company, LLC)

Type	Subject	Incoming Request	Decision
Exemption	Select Requirements of 10 CFR Part 73, Appendix B, "General Criteria for Security Personnel"	07/17/2020 Non-public (security-related)	08/03/2020 ML20203M233

NMSS Staff Hold Government-to-Government Meeting with Shoshone Bannock Tribes

On July 31, 2020, NMSS held a virtual, government-to-government meeting with the Shoshone Bannock tribes to discuss the Oklo COL application. The purpose of the meeting was to: (1) perform outreach to the tribes, (2) describe the U.S. Nuclear Regulatory Commission (NRC), and its safety and environmental review processes, and (3) provide points of contact for project management staff. The meeting was well attended by staff from the NRC, the tribes, and the Department of Energy (DOE). The staff shared details of the project, as well as future opportunities for tribal participation in the review process. The tribes were very thankful for the outreach and expressed a strong desire for continued communication regarding the project.

NMSS Staff Hold Teleconference on High-Burnup Spent Nuclear Fuel

On July 31, NMSS held a teleconference with representatives from the Nuclear Waste Technical Review Board (NWTRB) to discuss NRC's general and specific comments on a draft NWTRB report on the DOE's research program for the behavior of high-burnup (HBU) spent nuclear fuel (SNF) during extended dry storage and transportation. The NWTRB has developed similar reports with recommendations for DOE's activities related to the packaging and transportation of SNF in the past and has recently sought NRC comment on new reports before publishing. The staff's comments are intended to ensure that the report appropriately reflects NRC's role in regulating the safety of the HBU SNF during storage and transportation. The NWTRB staff indicated they plan to revise the report, as appropriate, based on the NRC comments. NWTRB may publish the report by the end of Calendar Year 2020.
