EA: 87-184

Precision Logging and Perforating
220 North Broadway
Cleveland, Oklahoma 74020

Gentlemen:

This refers to the routine, unannounced radiation safety inspection conducted by L. T. Ricketson of this office during the period August 18-19, 1987, of the activities authorized by NRC License 35-17186-02, and to the discussion of our findings held by the NRC inspector with members of your staff at the conclusion of the inspection. The enclosed NRC Inspection Report 30-19498/87-01 documents this inspection.

The inspection was an examination of the activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations, and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, independent measurements, and observations by the NRC inspector.

During this inspection, certain of your activities appeared to be in violation of NRC requirements. We are releasing this report at this time for your information and you are encouraged to review our findings and take corrective action as you believe appropriate. You will be notified by separate correspondence of our decision regarding enforcement action based on the findings of this inspection. No written response is required at this time.

This letter also confirms the telephone conversation between Mr. Greg Sparks and Mr. L. T. Ricketson of my staff on August 4, 1987, concerning our request to conduct an enforcement conference. The enforcement conference will be held at the City/County Health Department, Third Floor Conference Room, 4616 East 15th Street, Tulsa, Oklahoma, on September 22, 1987, at 10:00 a.m. to address the findings of the inspection referenced above and to gain your response to these findings.

Should you have any questions concerning this letter, we will be pleased to discuss them with you.

Sincerely,

Signature of W. L. Fisher
