Dear Sir,

I am interested in the forthcoming public hearing on the application of Pacific Gas & Electric for a construction permit for Sodega San Atomic Park. The following questions are derived from that interest.

1. I understand that there is a report, TID 15-329, dealing with power generation and transmission in utility systems. Could you advise me where I could get a copy of this report?
2. Apparently the Sodega application will be reviewed by an Advisory Committee on Reactor Safeguards and by a special three-man Board. Could you tell me the names of the current membership on these panels? Also, I would be interested to learn the occupations of these people and whether they are connected with the AEC in any way. If they are scientists, for example, I would like to know if their research or other activities are supported directly or indirectly by funds from the AEC.
3. I note that Chairman Seaborg, in his recent report to the President, seeks to justify converters of present design on the grounds that they will supply plutonium for the breeder reactors. Could you tell me how much plutonium we now have in stock and could you give me some idea about how much plutonium will be produced over the next decade?

I look forward with interest to your reply.

Sincerely yours,

J. B. Neillands
