

JUN 30 1987

FCAF:GCC

DOCKET NO: 70-754

LICENSEE: General Electric Company (GE)
Vallecitos Nuclear Center
Pleasanton, California

SUBJECT: SER - RADIOLOGICAL CONTINGENCY PLAN (RCP)

Background

By letter dated April 6, 1987, GE submitted changes to their Radiological Contingency Plan (RCP) for the Vallecitos Nuclear Center as required by License Condition No. 12 of Special Nuclear Material No. SNM-960.

Discussion

The proposed changes to the RCP involve the revision of the site and facility descriptions, and changes in organization and titles. The staff has reviewed the changes and agrees with the licensee's conclusion that they do not decrease the response effectiveness of the Plan. Accordingly, the staff recommends that the RCP be amended to incorporate these changes.

Regional Comments

The RCP changes were discussed with Buddy Brock of Region V on June 26, 1987. He has no objection.

Environmental Effects

No effluents will be generated as a result of this licensing action. Therefore, the environmental impact is minimal.

JUN 30 1987

Conclusion

Based on the discussion above, I believe the amendment can be issued without undue risk to the workers, the public or the environment. Therefore, I recommend the issuance of this license amendment be granted.
